

PREFACE

This volume of the annual hydrologic data report of Virginia is one of a series of annual reports that document hydrologic data gathered from the U.S. Geological Survey's and cooperating agencies' surface- and ground-water data-collection networks in each State, Puerto Rico, and the Trust Territories. These records of streamflow, ground-water levels, and water quality provide the hydrologic information needed by State, local, and Federal agencies, and the private sector for developing and managing our Nation's land and water resources. Hydrologic data for Virginia are contained in two volumes:

Volume 1. Surface-Water-Discharge and Surface-Water-Quality Records

Volume 2. Ground-Water-Level and Ground-Water-Quality Records

This report (Volume 1) is the culmination of a concerted effort by dedicated personnel of the U.S. Geological Survey and the Virginia Department of Environmental Quality who collected, compiled, analyzed, verified, and organized the data, and who typed, edited, and assembled the report. In addition to the authors, who had primary responsibility for assuring that the information contained herein is accurate, complete, and adheres to Geological Survey policy and established guidelines, the following personnel contributed significantly to the collection, computation, processing, and completion of this information:

Dennis W. Adams
Richard J. Ahlin
R. Brent Banks
Donna L. Belval
Ryan W. Boggs
Robert W. Buck
William V. Daniels, Jr.
Karl M. Dydak
Michael R. Eckenwiler
Patsy S. Francisco
Thomas L. Gibson
Joel R. Guyer
Harold G. Henderlite

Daniel W. Henry
Donna S. Justus
Ronnie E. Lawson
Roger M. Moberg
Daniel A. Nissen
Joseph A. Owens
Eugene D. Powell
Theodore B. Samsell, III
Dawn M. Valenti
Stephen L. Wheeler
Roger K. White
Richard L. Young

This report was prepared in cooperation with the State of Virginia and with other agencies under the general supervision of Ward W. Staubitz, District Chief.
